

Sonicam RWU provides moulds repair by using spot welding to eliminate small holes, repair edges and other defects on moulds.

Designed to fuse nickel pellets, metal powder or welding rods locally onto the surface of the moulds.

Benefits

- User friendly, does not require any welding experience
- Operates without the need of preheating and with minimal preparation time
- Safe and quick welding (around 1-2 sec)
- Robust, very long life-time
- Very low maintenance

Technical specifications	
Dimensions (LxWxH)	540 x 530 x 340 mm
Weight	58 KG
Voltage	380 V three phase (connect 2 phases only)
Max. temperature	85° (shutdown ensured by a pressure switch)
Nbr of weld points before overheating	+/- 20

| Spares & accessories

Welding gun assembly - 010.04.01

Earth lead - 010.04.02

Tip adaptor - 010.05.04

Copper tip - 010.05.03

| The right consumables for RWU

- Nickel shots pellets
- Metal powder
- Welding rod
